James and Shelly -

The 25K (~250 hours) funding for the proposed nutrient development has been confirmed and the folks in Washington would like to schedule a conference call between you all, Tetra Tech, and EPA (Washington and Regional staff) as soon as possible. Thus, I would appreciate if you would provide me with dates and times regarding your availability in the coming weeks.

New Mexico Nutrients Technical Direction Draft.docx

Attached is the statement of work that was prepared towards this effort. I have shared and talked to Ben Jessup regarding the statement of work and we both concur that at best, we will be able to complete tasks 1 - 3 since the data compilation will be a huge task to update the current data set, as developed for the sedimentation project, and to include the the national rivers and streams data. However, at present I have no further funds lined-up to carry the project to completion but I am still looking towards the TMDL program to offer funds later this summer.

"Far better it is to dare mighty things, to win glorious triumphs, even though checkered by failure, than to take rank with those poor spirits who neither enjoy much nor suffer much, because they live in the gray twilight that knows not victory or defeat." ~ Theodore Roosevelt

"...and 'tis our fast [first] intent to shake all cares and business from our age [of our state]; Conferring them on younger strengths, while we unburden'd crawl toward death..." ~ William Shakespeare's King Lear, Act I

"In every free and deliberating society, there must, from the nature of man, be opposite parties and...dissensions and discords;..." ~ Thomas Jefferson, 1798
